

**Workforce Southwest Washington
Workforce Innovation and Opportunity Act Policies and Procedures**

**Property Management and Inventory Directive
Policy: #2001 Revision 1**

Date of Origination: July 1, 2002
Effective Revision Date: May 25, 2016

Background:

[Public Law 113-128 Section 184\(a\)\(2\)\(A\)](#) requires each state, Local Workforce Development Board (LWDB), and service provider receiving funds under the Workforce Innovation and Opportunity Act (WIOA) of 2014 to comply with applicable uniform cost principles, including Uniform Guidance of the federal Office of Management and Budget (OMB). This policy will address how to ensure the management and inventory of all properties obtained using WIOA funds, including property purchased with Workforce Investment Act (WIA) funds and transferred to WIOA.

This policy applies to capital assets which are property with a cost of more than \$5,000 and an expected useful life of more than one year. Items with a unit acquisition cost of \$5,000 or less, such as furniture, software or electronics is not considered property and is to be classified as "Equipment". While such items are not capitalized and depreciated, they are still subject to certain terms of use.

Individuals and organizations must adhere to the property and inventory management standards established in Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards Subpart D-Post Federal Award Requirements, Property Standards ([2 CFR 200](#)).

Policy:

Equipment Management and Inventory:

Equipment is tangible, non-expendable personal property having a useful life of more than one year and an acquisition cost of more than \$5,000.

1. For Equipment, the LWDB and subrecipients will retain property records that provide:
 - A description;
 - The serial and model number or other identification number (WIOA tag);
 - The funding source of property, including grant or agreement number;
 - Whether title rests with the LWDB or sup-recipient, state or federal government or other entity;
 - An acquisition date and cost;
 - Percent federal participation in the project that purchased the equipment;
 - Location, use, condition, and last inventory date with initials of inspector; and
 - Disposal information, including date, location and sale price, if applicable following disposal procedure below.

2. A copy of the inventory of property must be maintained on file and available for review. In addition, the LWDB and subrecipients must:

- Keep property in good condition;
 - Use procedures to gain highest possible return on sold items;
 - Retain all records for three years after disposal of property; and
 - Tag all property purchased with WIOA funds that has a purchase or depreciated value of \$5,000.
3. Purchases of all equipment items greater than \$5,000 must have prior approval from WSW and the Assistant Commissioner of the Employment Security Department for the State of Washington. Subrecipients must submit request to the Fiscal Manager at WSW. WSW will facilitate approval from the Assistant Commissioner.

Small and Attractive Assets are fixed assets with a unit cost (including sales tax and ancillary costs) of less than \$5,000 which an agency considers particularly vulnerable to loss. In addition to 1 and 2 above, WSW and subrecipients:

1. Should perform a risk assessment (both financial and operational) of their assets to identify assets that are particularly at risk or vulnerable to loss. Such assets that fall below capitalization policies are considered small and attractive assets.
2. Should implement measures to control small and attractive assets in order to minimize identified risks. Periodically, grantees/subrecipients should perform follow up risk assessments to determine if the additional controls implemented are effective in managing the identified risks.
3. Must include as small and attractive assets all items in the commodity class code major group 10XX – Weapons, Firearms, Signal Guns, and Accessories.

Otherwise, grantees have discretion in setting their definition of small and attractive assets. However, absent a risk assessment and development of written policies for identifying and controlling small and attractive assets, grantees/subrecipients must include, at a minimum, the following assets with unit costs of \$300 or more as small and attractive:

- Laptops and Notebook Computers
- Tablets and Smart Phones

Grantees/subrecipients must also include the following assets with unit costs of \$1,000 or more:

- Optical Devices, Binoculars, Telescopes, Infrared Viewers, and Rangefinders
- Cameras and Photographic Projection Equipment
- Desktop Computers (PCs)
- Television Set, DVD Players, Blu-ray Players, and Video Cameras (home type)

Depreciation:

One of the following guidelines for depreciation must be used in accordance with OFM Guidelines State Accounting Manual [Section 30.20.70.b](#).

1. To calculate depreciation using the straight-line method:

$$\text{Annual Depreciation} = \frac{\text{Cost} - \text{Salvage Value}}{\text{Asset Useful Life}}$$

2. The composite method is based on weighted average estimated lives or an estimate of the useful life of the grouping of assets; such as library resources. The assessment could be based on condition assessments of experience with the useful lives of the groupings of assets. A consistent composite depreciation rate should generally be used throughout the life of the grouping of assets, but the rate should be recalculated if the composition of the assets or estimate of the useful lives changes significantly.

Useful Life for Capital assets

It is required to use the useful life shown in Schedule A, Capital Asset Commodity Class Code List and Useful Life Schedule ([subsection 30.50.10.a](#)) for capital assets acquired in new condition. For energy efficiency equipment and products, refer to the Addendum to Schedule A ([Section 30.50.10.b](#)). However, a shorter or longer estimated life may be used depending on factual circumstances, replacement policies, or industry practices.

For assets acquired in less than new condition, the useful life will be determined on a case by case basis. The useful life for leasehold improvements is the estimated service life of the leasehold improvements, or the remaining term of the lease, whichever is shorter. The useful life for intangible assets acquired by contract generally should not exceed the period of the contract.

For depreciation purposes, the useful life of assets should be reviewed to ensure it has remained the same, and that no modifications have extended or altered the life of the asset. Impairment of assets or changes in contractual provisions may impact the useful life and remaining depreciation.

Disposal procedure:

Equipment

1. The user or property reviewer will initiate and fully complete a Property Disposal Request Form for each item to be disposed.
2. The fiscal manager is responsible for recording the disposal in inventory, and physically disposing of the asset.
3. Notice of disposal of the asset will be sent by the WSW Fiscal Manager to the WA State Department of Information Services, (technology related equipment) or the Office of Commodity Redistribution housed under the state's Department of General Administration, (all other assets) and physical disposal will take place according to the appropriate agency guidelines.

Small and Attractive Assets

Unless the asset is deemed inoperative and therefore disposable, an effort will be made to make the asset available to related programs. The Executive Director will evaluate if the asset will be provided to WSW itself or a local WIOA service provider within the region. Assets not disposed of within the region will be offered through an email broadcast to other WDC's in Washington State, other local non-profit agencies who work with WorkSource customers, school and educational districts, and for-profit entities that have a mission similar to that of WSW, in that order. If not disposed of by this method, the property will be given to a local non-profit that recycles such equipment.

1. The user or property reviewer will initiate and fully complete a Property Disposal Request Form for each item to be disposed.
2. Disposals of this class of assets can be initiated by the current user or property reviewer.
3. Disposal will be recorded directly onto the property listing, noting the date of disposal, the condition of the asset, and its point of relocation, by the fiscal manager.

Definitions:

Equipment: Tangible, non-expendable personal property having a useful life of more than one year and an acquisition cost of more than \$5,000.

Supplies: All personal property other than equipment.

Fixed Assets: Assets (normally tangible, but including several intangibles) acquired through donation, gift, purchase, capital lease, or self-construction with a life expectancy of more than one year.

Capitalized Fixed Assets: Includes all land and all remaining fixed assets with a unit cost of \$5,000 or greater.

Inventoriable Fixed Assets: Includes all capitalized fixed assets plus all fixed assets meeting the definition of small and attractive.

Small and Attractive Assets: Fixed assets with a unit cost (including sales tax and ancillary costs) of less than \$5,000 which an agency considers particularly vulnerable to loss, thus subject to attractive assets which must be tagged and inventoried include equipment such as cell phones, personal computers, printers, laptop/notebooks, cameras, camcorders, televisions, video-cassette recorders, scanners, copiers, and fax machines.

Depreciation: The portion of the cost of a capital asset representing the expiration in the service life of the asset attributable to wear and tear, deterioration, action of the physical elements, inadequacy, and/or obsolescence which is charged systematically over the useful life of the capital asset. Refer to Office of Financial Management Policy Subsection [30.20.70.c](#). This element is not applicable to small and attractive assets.

Useful Life: The estimated useful life of the capital assets in years. Refer to Subsection [30.50.10](#) for Schedule A – Capital Asset Commodity Class Code List and Useful Life Schedule. This element is not applicable to small and attractive assets.
