

Adult & Dislocated Worker RFP – Q&A 02.14.25

Question: In the RFP, on page 11, under “Planned Performance Numbers”, I just wanted to clarify, for the number of “eligible individuals enrolled” are you looking for basic enrollments or basic and individualized enrollments.

Answer: *On the Planned Performance Number tables, we are looking for projected total enrollments. In the recent past, and the past several years especially, we have had both individualized and basic enrollment goals. WSW is currently in the process of working with the Employment Security Department’s Grant Management Office to really look critically at our performance targets for the area, and one of the requests we are trying to make right now is to deemphasize having separate basic versus individualized enrollment targets so we can focus on the quality of service versus all the administrative work that would go into accomplishing a whole set of separate basic enrollments. So, with that in mind, we are looking at and thinking about enrollments from more of that individualized, intensive career services perspective. That should be the focus of how many individuals you envision being able to provide that holistic, wrap-around support to versus support at a basic service level.*
