

# Talent Pool Development and Employer Data Desk Aid

This desk aid has been developed to outline the process used to enter qualified job seekers into Launchpad. In addition to showcasing the data that is required for job seekers to be qualified and matched to jobs, this desk aid serves as a guide to employer services and when to use them.

This desk aid describes how to:

- Enter job seeker information for the purpose of job matching and qualified talent
- Enter employer information and track services provided
- Prepare a job seeker's contact record using required checklist criteria
- Connect a qualified job seeker to employment opportunities
- Utilize data for reports

**The goal of the Qualified Talent Pool is to identify a regional source of job-ready talent who can be quickly matched to quality jobs in our region's high-demand industries.**
