

## Youth RFP - Questions and Answers 02.02.23

**Question:** Is the social media strategic plan an attachment or to be included within the 15-page program design?

**Answer:** *The social media strategic plan can be an attachment not included in the 15-page limit of the Program Design section.*

**Question:** Since we are required to imbed the questions in to proposal response, can they be included at a font size smaller than 12pt?

**Answer:** *Yes; questions must be minimum 10-point font size in order to still be legible.*

**Question:** Question 3 of the Demonstrated Experience and Ability section asks for your organization's experience in determining youth eligibility, are you looking for the consortium's, or the lead agency's experience?

**Answer:** *Question 3 of the Demonstrated Experience and Ability section applies to any organization that will be determining WIOA youth eligibility.*

**Question:** Question 5 of program design: Utilize a logic map to describe your program's organizational and staffing model, and the benefits of this model. Please include staffing job titles, their proposed hourly/ salary wages, and a brief description of job duties. – Do you want an Org chart for each tier partner or do you want a map of the consortium roles and responsibilities?

**Answer:** *Please provide an organizational chart for the provider(s) of core services and the functional leadership system including the information asked for in the question. Information for consortium partners can be limited to the name of the organization, the proposed investment into that organization as applicable, and a brief description on how they will be supporting your consortium.*

**Question:** Can the functional leader organization also provide GED services?

**Answer:** *It is unclear whether this question is asking if the same organization providing GED services can also employ the functional leadership system, or if the functional leadership system employees can themselves administer GED testing services. Either way, no, the functional leadership system should only provide the type of duties as defined in the RFP and should not provide direct participant services.*
